TO WHOM IT MAY CONCERN

From 2016 till 2018, Christophe Samyn and his company, OPSMAN, worked for us as security and risk management experts. In that capacity, OPSMAN was in charge of safety & security management for our team members and properties, in Belgium (Gosselies) and France (Arras). The responsibilities for which OPSMAN had responsibility are :

- Identifying and mitigating the risks for people, assets and properties
- Building the local security risks and crisis management plans
- Train and coach local management about crisis management

The value of the contract exceeds 300000€ for both contracts, Gosselies and Arras

I, herewith, attest that we were more than happy about the way Christophe took care of his responsibilities and recommend, without reservation, his services to anybody who would need security and risk management services. Christophe is the utmost professional and competent security expert who is extremely knowledgeable and easy to work with. I remain available to discuss Christophe, OPSMAN, and their exemplary work should you require any additional details or explanations.

All the best,

Henry Clark
